

Dragonfly Energy Wins Dual Honors at 2026 SEAL Business Sustainability Awards for Breakthrough Trucking Power Solution

February 4, 2026

Battle Born® DualFlow Power Pack recognized for reducing fuel waste and CO2 emissions while improving fleet efficiency and driver comfort

RENO, Nev., Feb. 04, 2026 (GLOBE NEWSWIRE) -- [Dragonfly Energy Holdings Corp.](#) (Nasdaq: DFLI) ("Dragonfly Energy" or the "Company"), an industry leader in energy storage and battery technology and maker of Battle Born Batteries®, won both the Sustainable Innovation Award and the Sustainable Product Award at the 2026 SEAL (Sustainability, Environmental Achievement, Leadership) Business Sustainability Awards. The honors recognize Dragonfly Energy's Battle Born® DualFlow Power Pack, a lithium power solution designed to significantly reduce diesel engine idling in long-haul trucking, one of the industry's most persistent sources of fuel waste and carbon emissions.

In real-world fleet use, Dragonfly Energy's Battle Born® DualFlow Power Pack, a lithium-powered Auxiliary Power Unit (APU) system, has demonstrated idle-hour reductions of nearly 70%, preventing an estimated 10–12 metric tons of CO₂ emissions per vehicle annually when deployed at scale.

The SEAL Business Sustainability Awards honor companies demonstrating measurable environmental impact through innovation and leadership. Dragonfly Energy received the Sustainable Innovation Award for introducing a breakthrough approach to reducing diesel idling, and the Sustainable Product Award for delivering a purpose-built solution that translates sustainability goals into real-world operational benefits.

The DualFlow Power Pack enables truck drivers to power essential hotel loads during mandatory rest periods without running the engine. Installed inside the sleeper cab without requiring vehicle modifications, the system is powered by Battle Born® LiFePO₄ batteries and Wakespeed® charge control technology, helping reduce idle time while supporting starting battery health and lowering overall engine wear and maintenance.

"Dragonfly Energy is honored to receive the SEAL Sustainable Innovation and Product Awards for the Battle Born DualFlow Power Pack," said Wade Seaburg, *chief commercial officer* at Dragonfly Energy. "This recognition reinforces our belief that sustainability and performance are not mutually exclusive. It is rewarding to see practical, deployable innovation recognized alongside broader sustainability leadership."

The DualFlow Power Pack is designed to deliver measurable environmental benefits while improving day-to-day fleet operations, offering drivers greater comfort and helping fleets reduce maintenance demands without disrupting existing vehicle platforms.

About Dragonfly Energy

Dragonfly Energy Holdings Corp. (Nasdaq: DFLI) is a comprehensive lithium battery technology company, specializing in cell manufacturing, battery pack assembly, and full system integration. Through its renowned Battle Born Batteries® brand, Dragonfly Energy has established itself as a frontrunner in the lithium battery industry, with hundreds of thousands of reliable battery packs deployed in the field through top-tier OEMs and a diverse retail customer base. At the forefront of domestic lithium battery cell production, Dragonfly Energy's patented dry electrode manufacturing process can deliver chemistry-agnostic power solutions for a broad spectrum of applications, including energy storage systems, electric vehicles, and consumer electronics. The Company's overarching mission is the future deployment of its proprietary, nonflammable, all-solid-state battery cells.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that are not historical statements of fact and statements regarding the Company's intent, belief, or expectations, including, but not limited to, statements regarding the Company's recognitions at the 2026 SEAL Business Sustainability Awards, the Company's future results of operations and financial position, planned products and services, business strategy and plans, market size and growth opportunities, competitive position and technological and market trends. Some of these forward-looking statements can be identified by the use of forward-looking words, including "may," "should," "expect," "intend," "will," "estimate," "anticipate," "believe," "predict," "plan," "targets," "projects," "could," "would," "continue," "forecast" or the negatives of these terms or variations of them or similar expressions.

These forward-looking statements are subject to risks, uncertainties, and other factors (some of which are beyond the Company's control) which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Such factors include those set forth in the sections entitled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, and in the Company's subsequent filings with the SEC available at www.sec.gov. If any of these risks materialize or any of the Company's assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. There may be additional risks that the Company presently does not know or that it currently believes are immaterial that could also cause actual results to differ from those contained in the forward-looking statements. All forward-looking statements contained in this press release speak only as of the date they were made. Except to the extent required by law, the Company undertakes no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they were made.
