

Dragonfly Energy Expands OEM Collaboration with Ember

September 9, 2025

Standardized Battle Born Batteries® deliver up to 7 kWh of power in Ember's Overland Series

RENO, Nev., Sept. 09, 2025 (GLOBE NEWSWIRE) -- [Dragonfly Energy Holdings Corp.](#) (Nasdaq: DFLI) ("Dragonfly Energy" or the "Company"), an industry leader in energy storage and maker of Battle Born Batteries®, announced that Ember Recreational Vehicles has standardized Battle Born Batteries in its 2026 Overland Series. The move expands a long-standing collaboration that began with Ember's founding in 2021, when it chose Battle Born Batteries exclusively to power its off-grid travel trailers.

The new standard Max Solar Package – Powered by Battle Born® provides Ember customers with a complete energy system for extended off-grid adventures, including:

- 3.5 to 7 kWh of LiFePO₄ batteries
- 1,200 watts of rooftop solar
- 3,000W inverter/charger with communication center, powering the entire RV
- DC-to-DC charger for efficient charging on the road

The power system features Battle Born® GC3 deep cycle batteries (12V, 270Ah each), providing capacities from 3.5 to 7 kWh. Designed to support a wide range of needs, the system delivers a more capable and enjoyable off-grid experience.

Battle Born Batteries also remain available as optional upgrades on Ember's Touring Edition and E-Series models, offering factory-installed systems with up to 7 kWh of reliable lithium power.

"Solar panels are the gas pump — but batteries are the gas tank," said Wade Seaburg, chief commercial officer of Dragonfly Energy. "By making Battle Born Batteries standard in the Overland Series, we believe Ember is giving its customers the energy storage capacity they need to take full advantage of their solar power. That means longer run times, the ability to power real appliances, and a more confident experience off the grid."

"From the very beginning, Ember has relied exclusively on Battle Born Batteries to power our products," said Chris Barth, chief operating officer of Ember Recreational Vehicles. "Standardizing them in our Overland Series is the natural next step to give our customers the confidence and capability they expect from Ember. With up to 7 kWh of lithium power available, our owners can run appliances longer, stay comfortable in remote environments, and truly experience what off-grid camping is meant to be."

With Ember's Overland Series now shipping standard with Battle Born Batteries, the two companies continue to advance the RV industry's move toward integrated, factory-installed lithium power systems — giving travelers more independence, safety, and comfort in any environment.

Attendees of America's Largest RV Show® in Hershey, Pennsylvania (September 10–14, 2025) can see Ember's newest models featuring the standard Max Solar Package at Booth #A10. Visitors can also learn more about Battle Born Batteries® and Dragonfly Energy's full line of advanced lithium power solutions at Booth #539.

About Dragonfly Energy

Dragonfly Energy Holdings Corp. (Nasdaq: DFLI) is a comprehensive lithium battery technology company, specializing in cell manufacturing, battery pack assembly, and full system integration. Through its renowned Battle Born Batteries® brand, Dragonfly Energy has established itself as a frontrunner in the lithium battery industry, with hundreds of thousands of reliable battery packs deployed in the field through top-tier OEMs and a diverse retail customer base. At the forefront of domestic lithium battery cell production, Dragonfly Energy's patented dry electrode manufacturing process can deliver chemistry-agnostic power solutions for a broad spectrum of applications, including energy storage systems, electric vehicles, and consumer electronics. The Company's overarching mission is the future deployment of its proprietary, nonflammable, all-solid-state battery cells.

Forward-Looking Statements

This press release contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements include all statements that are not historical statements of fact and statements regarding the Company's intent, belief, or expectations, including, but not limited to, statements regarding Battle Born Batteries with Dragonfly Intelligence, the Company's future results of operations and financial position, planned products and services, business strategy and plans, market size and growth opportunities, competitive position and technological and market trends. Some of these forward-looking statements can be identified by the use of forward-looking words, including "may," "should," "expect," "intend," "will," "estimate," "anticipate," "believe," "predict," "plan," "targets," "projects," "could," "would," "continue," "forecast" or the negatives of these terms or variations of them or similar expressions.

These forward-looking statements are subject to risks, uncertainties, and other factors (some of which are beyond the Company's control) which could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Such factors include those set forth in the sections entitled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in the Company's Annual Report on Form 10-K for the year ended December 31, 2024, and in the Company's subsequent filings with the SEC available at www.sec.gov. If any of these risks materialize or any of the Company's assumptions prove incorrect, actual results could differ materially from the results implied by these forward-looking statements. There may be additional risks that the Company presently does not know or that it currently believes are immaterial that could also cause actual results to differ from those contained in the forward-looking statements. All forward-looking statements contained in this press release speak only as of the date they were made. Except to the extent required by law, the Company undertakes no obligation to update such statements to reflect events that occur or circumstances that exist after the date on which they were made.
